

**[DRAFT] Data Sheet E – Results of Internal Review Committee**

Date of Review/Recommendation: November 22, 2010

Water Body Under Evaluation:

Water Body ID #: 1935  
Name: Shoal Creek (Class C)  
Length of Segment: 3.0 miles  
County (ies): Crawford

Use Attainability Analysis (UAA) Study:

UAA ID #: 1278  
Submitter: Olsson Associates  
Date(s) Conducted: August 14, 2008  
Date Received: October 14, 2008, revised  
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.  
☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.  
☐ 3-Non-Remedial, Human Caused Condition.  
☐ 4-Hydrologic Modifications.  
☐ 5-Natural Physical Features.  
☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown

Comments: The UAA survey was conducted in August 2008 and there were no WBCR observed. There is an unclassified lake as part of the classified stream segment. In an interview that was conducted during the study it was noted that swimming, fishing and camping did occur in and around the lake since November 28, 1975, but was unaware of WBCR or SCR use in the creek.

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The stream did meet the maximum depth for WBCR at site #1. Since this stream contains an unclassified lake as part of the stream segment, it is the recommendation of this committee that WBCR use be retained and SCR added. Also the committee suggests that this stream be reexamined to classify the lake portion and divide the stream segments.

**Committee Recommendation:**

☐ Add Use ☒ Retain Use ☐ Remove Use  
☐ Modify Use ☐ Inconclusive
